

# STATE BOARD OF EDUCATION PROPOSED HEALTH STANDARDS STEAL CHILDREN'S INNOCENCE AND SILENCE PARENTS

## Problems with the Proposed Standards:

- They normalize dangerous, unhealthy behavior to children—pushing sexual promiscuity, queer gender theory, and other perversions as early as 6<sup>th</sup> grade
- They sow distrust between parents and children, teaching even the youngest children to question if their parents are “trusted adults” and “safe” to talk to
- They side-step transparency laws by reclassifying “sex education” as “health education”, silencing clergy and skirting laws that require parents to be notified
- There is no clear parental opt out—Health class is required for K-12 Students

## How YOU Can Help:
